

◀ 手術後一星期，傷口難以察覺  
No unsightly scar one week after surgery

## The Patented DHI Technique

DHI® is a major improvement in the development of hair transplantation. The whole concept of hair transplantation is to remove hair follicles from areas where the hairs will grow for a lifetime to the bald regions, so that the bald regions are replenished with his own permanent hairs again. DHI® is a minimally invasive technique. The whole procedure is carried out under local anesthetic with minimal pain, no scalpels nor sutures nor conspicuous scars.

We extract each single hair follicular unit one by one with specialized tools. The extracted hairs would be trimmed under microscope and implanted into the bald region using implanter. With the help of this instrument, there will be minimal damage to the follicles and better control of the density, depth, angle and direction of the implanted hairs resulting in the optimal cosmetic results. The extracted wound would be less than 1mm in diameter with inconspicuous or virtually no scarring. Most of the implanted hairs will usually fall out in 4 weeks and new hairs will re-grow from the follicles in around three months time. Full re-growth of permanent hairs would be expected in around ten months.

**Our DHI® technique can solve your hair loss problem, rebuilding your confidence.**

細意關懷 悉心照顧

Tender • Loving • Caring

ISO 9001:2000 Cert. No. FS 66763

## 脫髮是非常普遍之現象

- 估計全球約有50%人口受影響
- 事實上，脫髮會令患者感到非常困擾
- 永久性且功效顯著的治療方法現已產生
- 植髮是最終的解決方法，它可使頭髮永久生長於已禿髮之部位上，回復美觀

### 仁安植髮中心

仁安植髮中心為DHI International的香港代理，是全亞洲**首間及唯一**採用嶄新DHI®技術的植髮中心。我們提供周全的植髮服務，由受過專業訓練及認可的醫生提供諮詢、手術及定期跟進等。

DHI International是一所國際性植髮機構，擁有逾37年之植髮經驗，於全球設有多所植髮中心。2003年，DHI International成功研發出微創植髮技術，即專利的DHI®植髮技術，成功為全球超過50,000位脫髮人士植髮，為他們解決脫髮問題。

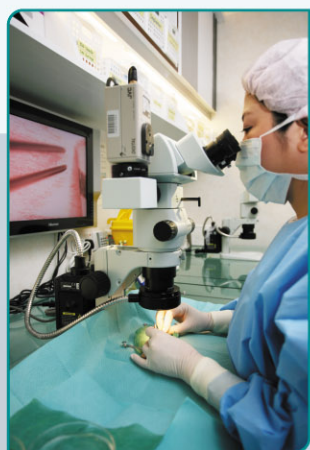

### 專利DHI® 植髮技術

DHI® 是植髮技術上的一項突破，它的概念是在永久性頭髮生長區摘取毛囊單位，然後移植到禿髮的部位，使禿髮部份能再次永久長出頭髮。DHI® 植髮技術是一項微創手術，只需局部麻醉，毋須開刀縫針，痛楚輕微，傷口難以察覺。

我們會先利用特製的工具逐一摘取毛囊單位，取出的頭髮會用顯微鏡小心處理，再以植髮器把頭髮移植到禿髮的位置。植髮器能減少對頭髮毛囊的破壞，並能準確地控制植髮的深度、角度和方向，營造自然的效果。摘取毛囊單位之傷口直徑少於一毫米，疤痕細微及難以察覺。大部份被移植的頭髮會於四星期內脫掉，毛囊於三個月內會長出新頭髮，約十個月後，植髮的位置便完全長出終生生長的頭髮。

### DHI® 植髮技術令你擺除脫髮之煩惱，重拾自信

Extracted hairs would be implanted into bald region using Implanter.

## Hair Loss is Very Common AND Distressing

- It is estimated to affect 50% of the population worldwide.
- In reality, hair loss is distressing to the sufferer.
- Nowadays, effective and permanent treatment is available.
- The ultimate solution is hair transplantation resulting in hairs that will grow for a life time!

### Union DHI Hair Centre

Being the licensee of the DHI International, the Union DHI Hair Centre is the **FIRST** and the **ONLY ONE** hair restoration centre in Asia to adopt the DHI® technique. We offer comprehensive full hair care package; from consultation to surgery to regular follow up by a team of doctors who are professionally trained and certified.

DHI International is a global hair restoration centre with more than 37 years of experience in hair restoration and clinics all over the world. It developed the minimally invasive hair implantation technique in 2003, ie. DHI: Direct Hair Implantation®, and has successfully helped more than 50,000 customers worldwide to replace hairs that would grow naturally for life time.
